

train'maintain

Target group

- ◆ Maintenance staff

Objective

- ◆ You will be able to recognise hazards that could cause accidents and minimise them
- ◆ You will learn how to plan and perform maintenance tasks
- ◆ You will be able to identify spare parts which are needed and how to order them
- ◆ You will be able to perform all maintenance tasks to ensure failure-free production on the machine
- ◆ You can carry out mechanical basic settings of the machine
- ◆ You will be able to check, adjust and optimise machine components

Prerequisites

- ◆ Experience in working with glass
- ◆ Completion of basic course «train'operate LEV1» or comparable knowledge
- ◆ Technical training or comparable knowledge

Contents

- ◆ Development of knowledge from the «train'operate LEV1» course
- ◆ Instruction in the safety concept with presentation of safety devices
- ◆ Detailed instruction in the electronic parts catalogue "Bystronic Parts Catalog"
- ◆ Explanation of the maintenance overview and periodic maintenance diagrams
- ◆ Explanation of the basic mechanical and electrical settings of machine components
- ◆ Checking, adjusting and optimising the machine's measuring devices
- ◆ Explanation of what periodic cleaning and maintenance tasks must be performed to ensure failure-free production on the machine

Completion

- ◆ A certificate will be awarded upon successful completion of the course

More advanced courses

- ◆ «train'repair» – minimising down time
- ◆ «train'know» – raising productivity
