

train'operate LEV2

Target group

- ◆ Operating staff, maintenance staff

Objective

- ◆ You will be able to recognise hazards that could cause accidents and minimise them
- ◆ You will become familiar in detail with all machine components
- ◆ You will become familiar with the correct parameters and corrections to optimise product quality
- ◆ You will become familiar with the steps required to keep production working efficiently and properly
- ◆ You will be able to perform simple cleaning and maintenance tasks on the machine
- ◆ You will be able to help reduce down time by means of proper error analysis

Prerequisites

- ◆ Experience in working with glass
- ◆ Experience with tools and machines, or at least an understanding of the mechanical processes and technical connections
- ◆ Completion of basic course in machine operation «[train'operate LEV1](#)» or comparable knowledge

Contents

- ◆ Instruction in the safety concept with presentation of safety devices
- ◆ Detailed explanation of the main components and their functions with practical demonstration
- ◆ Detailed explanation of operating software with practical implementation
- ◆ Detailed explanation of parameters and settings that are important for production
- ◆ Make corrections and observe the effects during production
- ◆ Saving parameters and reloading backed up data back onto the machine
- ◆ Explanation of what simple cleaning and maintenance tasks must be performed on the machine
- ◆ Explanation of what cleaning agents and lubricants must be provided
- ◆ Explanation of text messages as a diagnostic aid in work sequence problems

Completion

- ◆ A certificate will be awarded upon successful completion of the course

More advanced courses

- ◆ «[train'maintain](#)» – ensuring product quality
- ◆ «[train'repair](#)» – minimising down time
- ◆ «[train'know](#)» – increasing productivity
