

B'CHAMP

THE NEW MACHINE GENERATION FOR THE EFFICIENT PROCESSING OF AUTOMOTIVE GLASS AND THIN GLASS

YOU CAN ALWAYS RELY UPON:

- German-Swiss quality standards
- High efficiency and reliability
- Worldwide after-sales service

Profitability in automotive glass pre-processing will now be redefined. The optimized functions of the new B'CHAMP generation enable you to enhance the efficiency in your daily production. For you this means:

- Intuitive operation for maximum yield
- Minimized glass transportation times
- Optimized cycle times
- Reaction-fast software for minimizing downtimes
- Excellent cost-per-unit ratio
- «Green Production» due to energy recovery
- Proven thin glass capabilities down to a 0.4 mm glass thickness

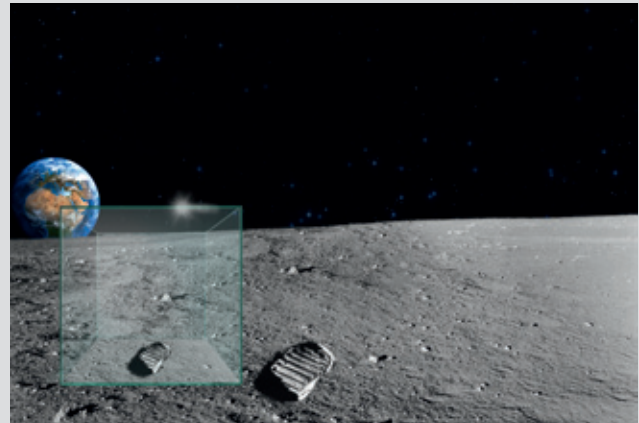

ADVANTAGES AT A GLANCE.

WITH BEST IN MARKET EFFICIENCY AND FLEXIBILITY, B'CHAMP PROVIDES THE EDGE OVER YOUR COMPETITION. WELCOME TO THE FUTURE!

SUPERFAST CHANGEOVER – HIGH PERFORMANCE

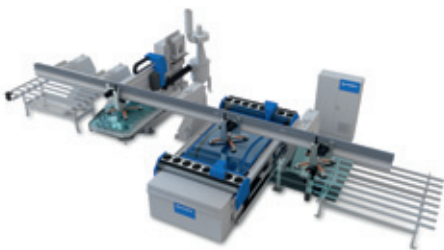

The outstanding accessibility to the key components and the innovative software-based support dramatically improves changeover times when changing the model and minimize your downtimes. The automatic glass positioning aid leads to the highest possible flexibility in connection with the automated single piece production.

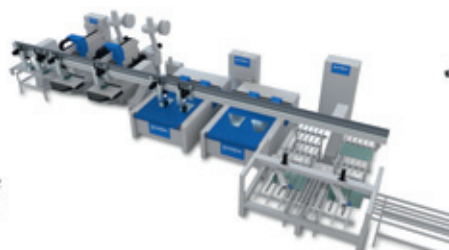

SMALLER FOOTPRINT – BIGGER BUSINESS

By optimizing the key components for the glass processing in a linear manner, space is saved through ingenuity. For you this means a reduced footprint by up to 50%, a transparent and continuous material flow as well as improved maintenance possibilities.

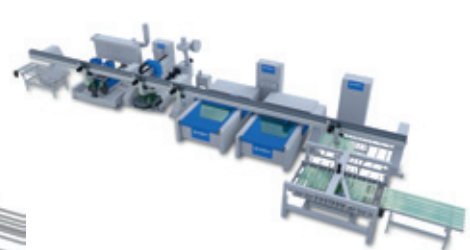

THREE COMPLETELY NEW VARIANTS WITH NUMEROUS CUSTOMIZED SOLUTIONS

B'CHAMP WS
for the manufacturing of windshields

B'CHAMP QL
for the production of quarter lites

B'CHAMP SL
for the fabrication of side lites
